Muzica Disco Selectii Vechi

.. Category:Culture in Bucharest Category:Nightlife Category:Popular cultureQ: Drawing a red border around a plot in Matlab? This question is a simple one. I have a figure containing the x- and y-axis displayed in a regular plot area. Now I'd like to draw a red border around the plot. Is this possible in Matlab? If it's not possible with a single plot command, is there another way to accomplish what I want? Thanks in advance! A: You need to do a bit more than just draw a red border. You need to configure the figure, including setting the default color scheme, and then draw the plot (because you want to draw the rectangle in the background, you also need to convert the plot to the default figure). To make a red border, you need to set the figure's background color (fig.color), foreground color (fig.clf), and current axes color (ax.color). You also need to set the axes properties, which control the axes' appearance. Axes properties are set using the set command. You can use the properties listed in the question to set all of them. The complete code: figure('Color',[1 0 0],'Color',[0 0 0],'ColorOrder','z','ColorScheme','default'); ax = axes('Parent',figure,'YDir','reverse','Color',[0 0 0],'Position',[500 500 1 1],... 'XLim',[-1 1],'Data',[],'YLim',[-1 1],'Groups',{1},'xlim'); set(ax,'XColor',[1 0 0],'YColor',[0 1 0],'YTick',[],'Ytick',[-1 0 1],'YTickLabel',[],'YTickLabelDistance',[0 0 0],'YTickDir','reverse'); set(ax,'XTick',[],[],'XTick',[],'XTickLabel',[],'XTickLabelFontWeight','Bold','XTickLabelFont','Times-Bold','XTickLabelFontScale',0.8,'XTickLabelRotation',0,'XTickLabelFontAngle',3da54e8ca3
