“12 Labours of Hercules” is a time management strategy game. Do you want to complete your first adventure, or you’re a veteran player? Then, great news! In the newest installment of the “Labours”, you will meet the same pythons, challenging bosses and traps, as before! But you will discover new, more diverse locations and time settings. If the ancient gods don’t want to lose their favorite hero, then they will give him many questions to answer and save the

world from the clutches of time! Therefore, a new time management strategy game is added to the “Labours” series. Help Hercules overcome challenges and obstacles! This time, your goal will be to complete all your new tasks, including solving puzzles, beating bosses and finding the necessary items! However, try to stay alive, because hidden traps can seriously spoil your experience. Your fragile character can disappear at any moment. If you press Esc, you can return to the main menu and try again, but you’ll have to work harder to get through the next level. Don’t forget that your character in the game is a mortal. If you die, you will lose everything you’ve accomplished. So be careful and pick up everything you need to complete your goal. But don’t forget to save the world! It’s a story of Hero. One bright sunny day, brave Hercules is sleeping in a hammock next to a cook fire. Suddenly, a thunderbolt wakes the hero up and his donuts get burnt. All the plans of poor Hercules are ruined and he dozed off again. But what should he do? To make things right, he decides to turn time back to the past and move the clock’s hand back a little. He doesn’t know that his action is a terrible mistake, which will
